---

### EMAILS WITH RIGHT-WING ORIENTED PROPAGANDA

**Alzey, 22. June 2004**

Since early June, thousands of Emails containing right-wing propaganda are send by computers infected with the SOBER-Family virus. We have received evidences that emails using addresses from SAGA D.C. are also spread around. We have run deep internal audits to assure that no system of SAGA D.C. is infected or could be used as an open mail relay to distribute such emails. The basic information on this topic could be read mainly in German media or the German BSI (Federal Institut for Security in the Information Technology) at this Link <http://www.bsi.de/presse/pressinf/sober150604.htm>

If you received an email with such a content, please send this to us as an attachment in a new mail (to keep the Mail-Headers intact). Some hints to identify that we cannot be the sender of this email. We only deliver Email out of our assigned IP-Address Space from our Mail-Servers. The emails in question are mostly delivered out of dynamic assigned IP-Addresses from large ISPs for Home-PCs. The SOBIG-Family Email-System currently assigns an unusual QMAIL-Message ID. Instead of the typical Message-ID of the QMAIL-Server it uses a hexadecimal-Message-ID.

We apologize the inconvenience that this may cause you even if we are not responsible for it.

---

**SAGA D.C. GmbH** was founded in 1988 as an independent Software Development Company. Our focus is Host-Integration with Security-Implementation, Single-Sign-On and E-Government. SAGA D.C. is located in Alzey (close to Mainz) and act as a Platinum PRO Partner of OpenConnect Systems in Germany, Austria and Switzerland. Since April 2004, SAGA D.C. is also an Advanced Business Partner of IBM's Software Group with Focus on WebSphere and Host-Integration.

ist ein 1988 gegründetes Softwarehaus und versteht sich als System- und
